141. WHAT IS LIVE-GUARD (JUNE 2025)

STEP 1

Live-Guard is a feature that allows your cameras to detect people and/or vehicles in specific targeted locations.

When the person or vehicle is detected, the camera can send a **notification** to your phone, and also set off **strobe lights** and **sirens** to deter the intruder.

STEP 2

The Live-Guard system is setup by your installer.

Once setup, you can turn the Live-Guard feature (ie: people or vehicle detection) on or off at any time, via the **smartphone app**.
