

## **145. HOW TO DISPLAY AND TEST VCA RULES** **(JUNE 2025)**

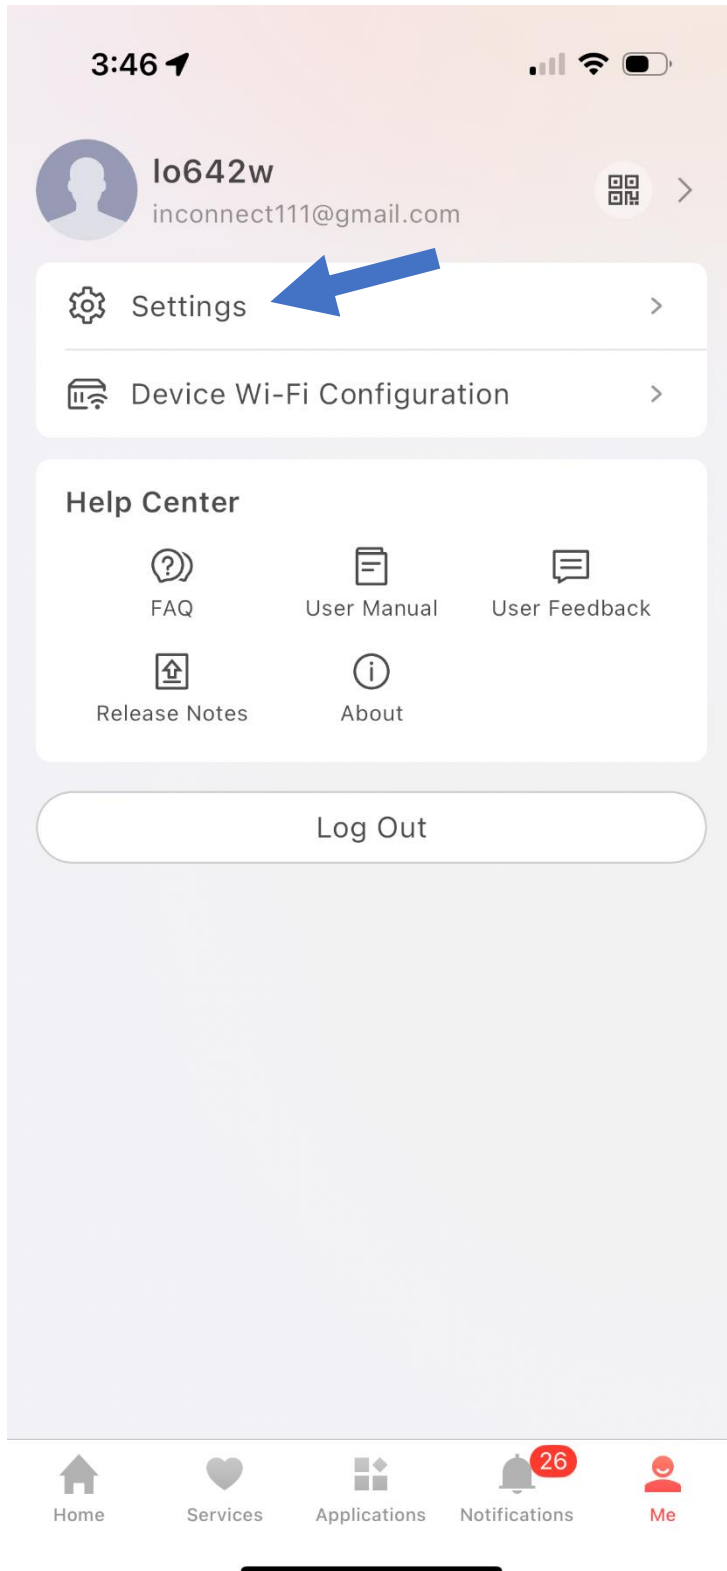

### **STEP 1**

Go to the 'Me' menu.

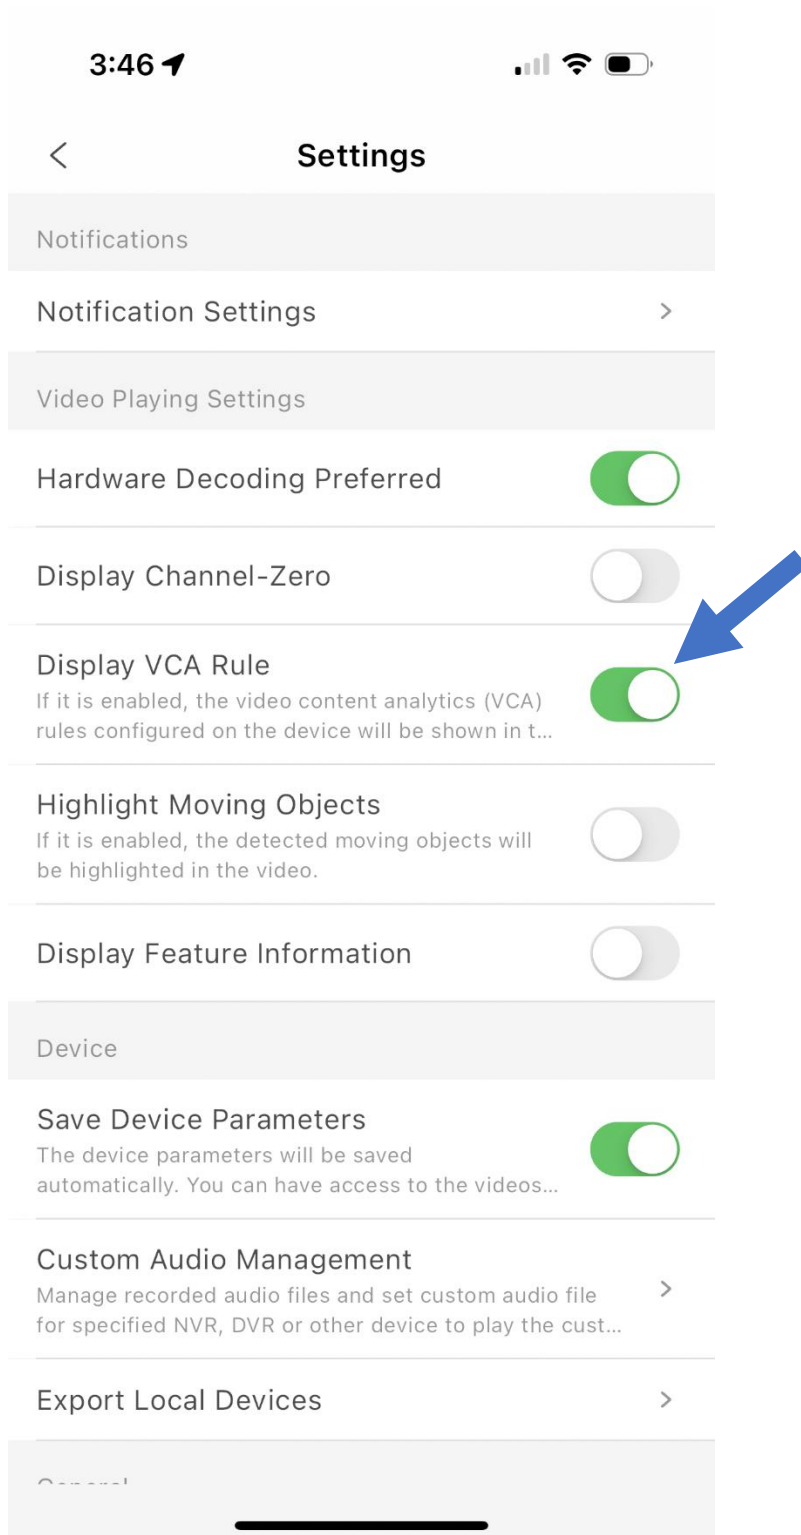

## STEP 2

Go to the 'Settings' menu.

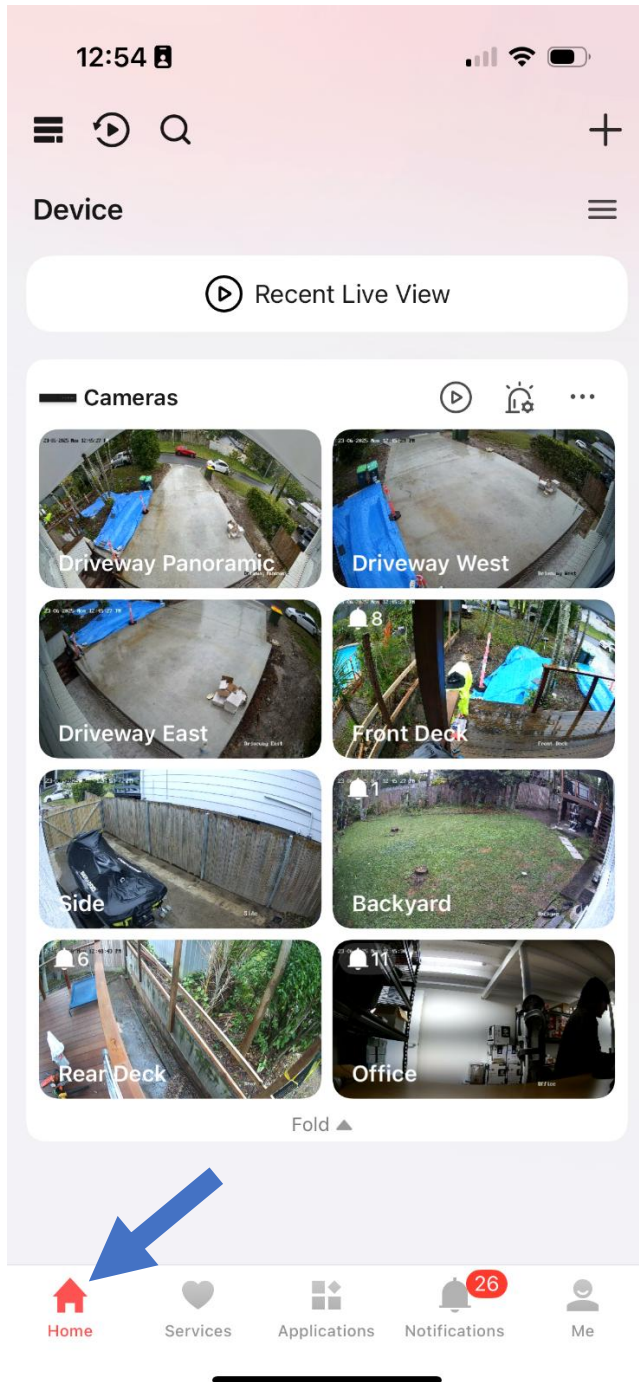

## STEP 3

Turn on 'Display VCA Rule'

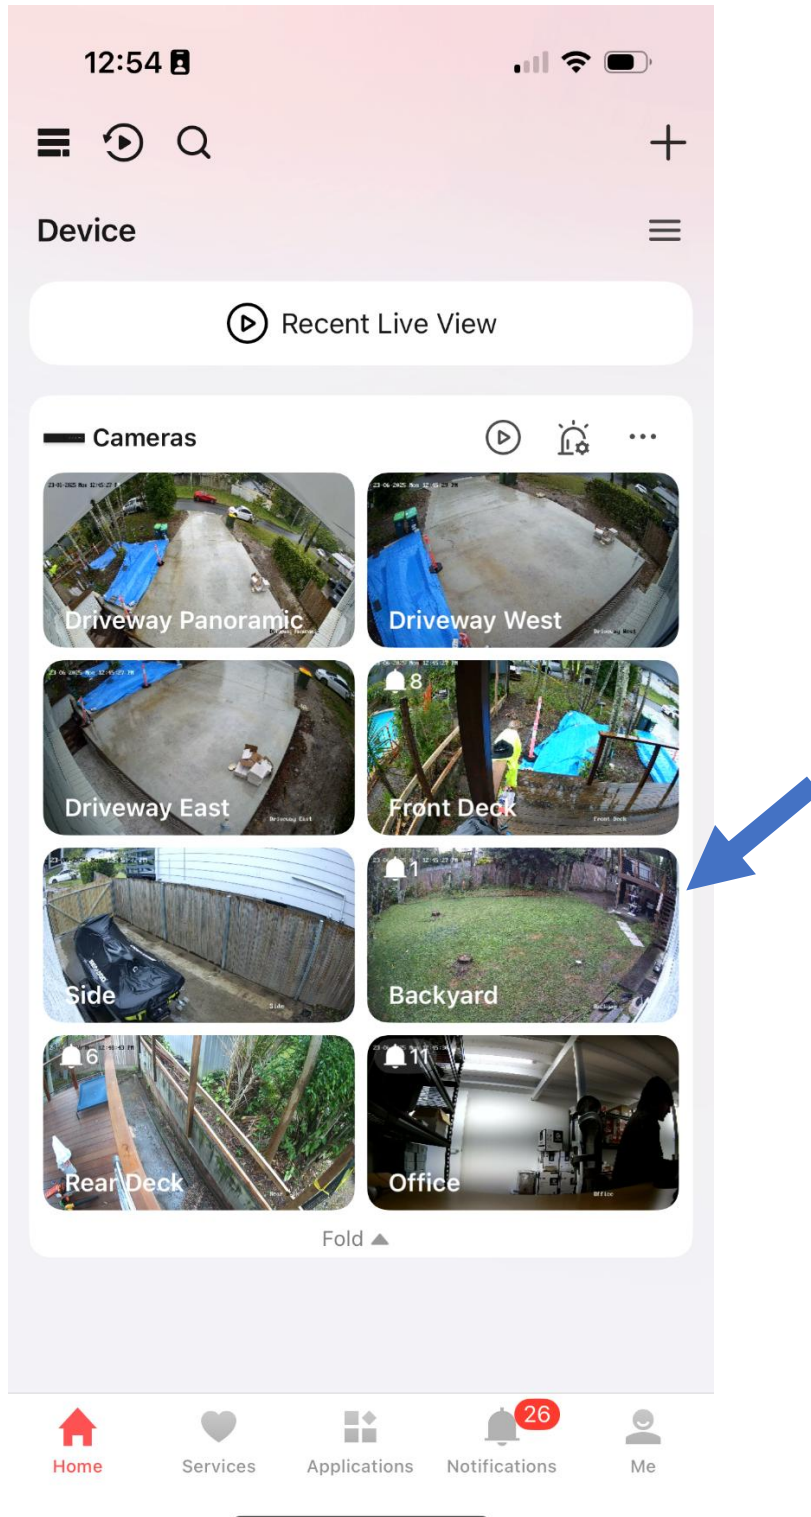

## STEP 4

Go back to the 'Home' screen.

## STEP 5

Click on the required camera to test.

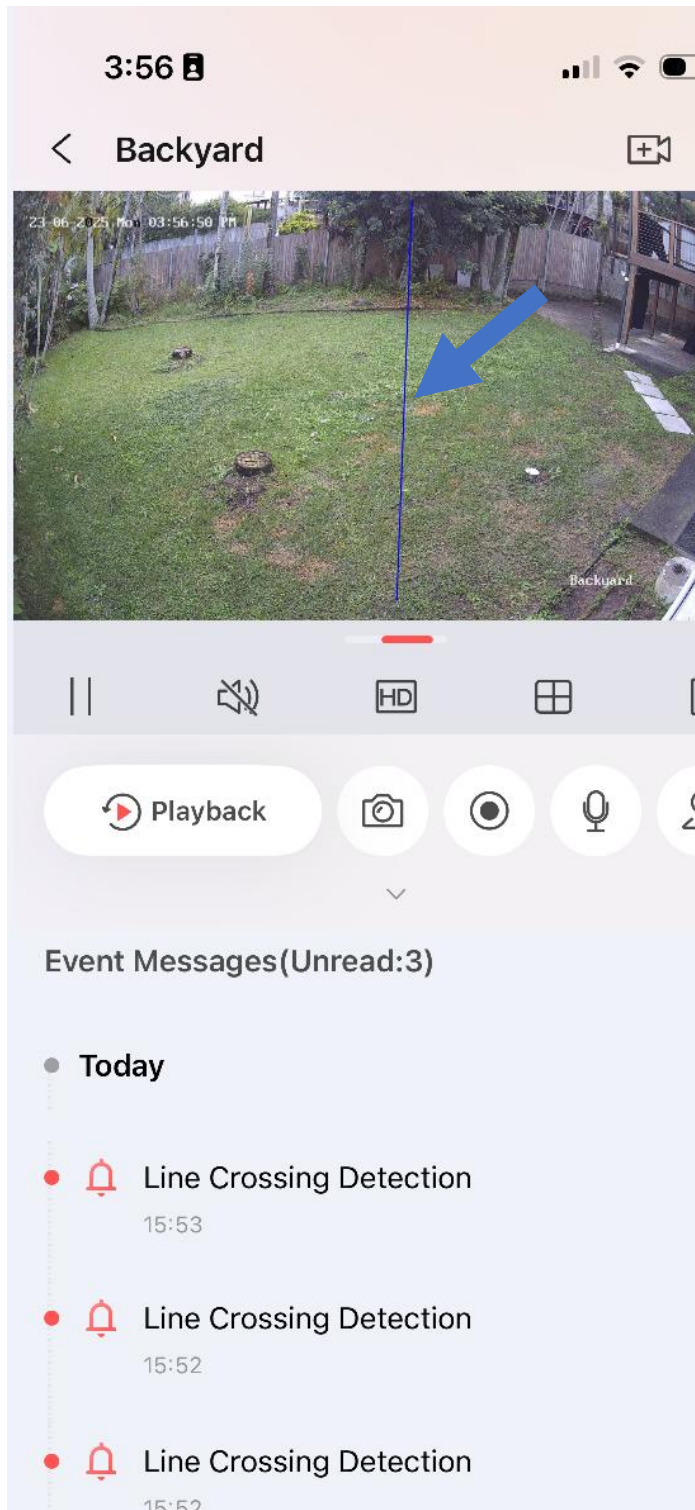

## STEP 6

You will be viewing the Live-View, with the VCA Rule (ie: Perimeter Protection) on the screen.

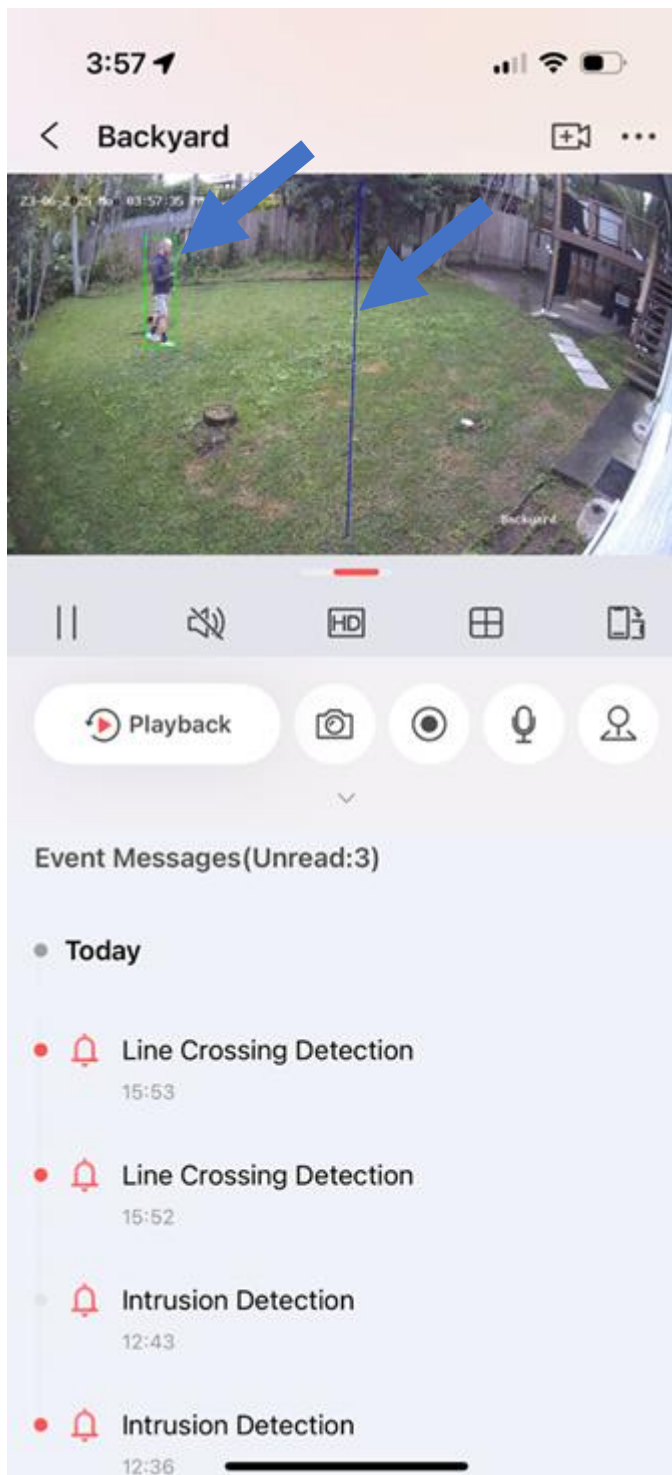

In this example, the VCA Rule is a line crossing rule shown by a blue line.

## STEP 7

Move a target (ie: person or vehicle) towards the VCA Rule.

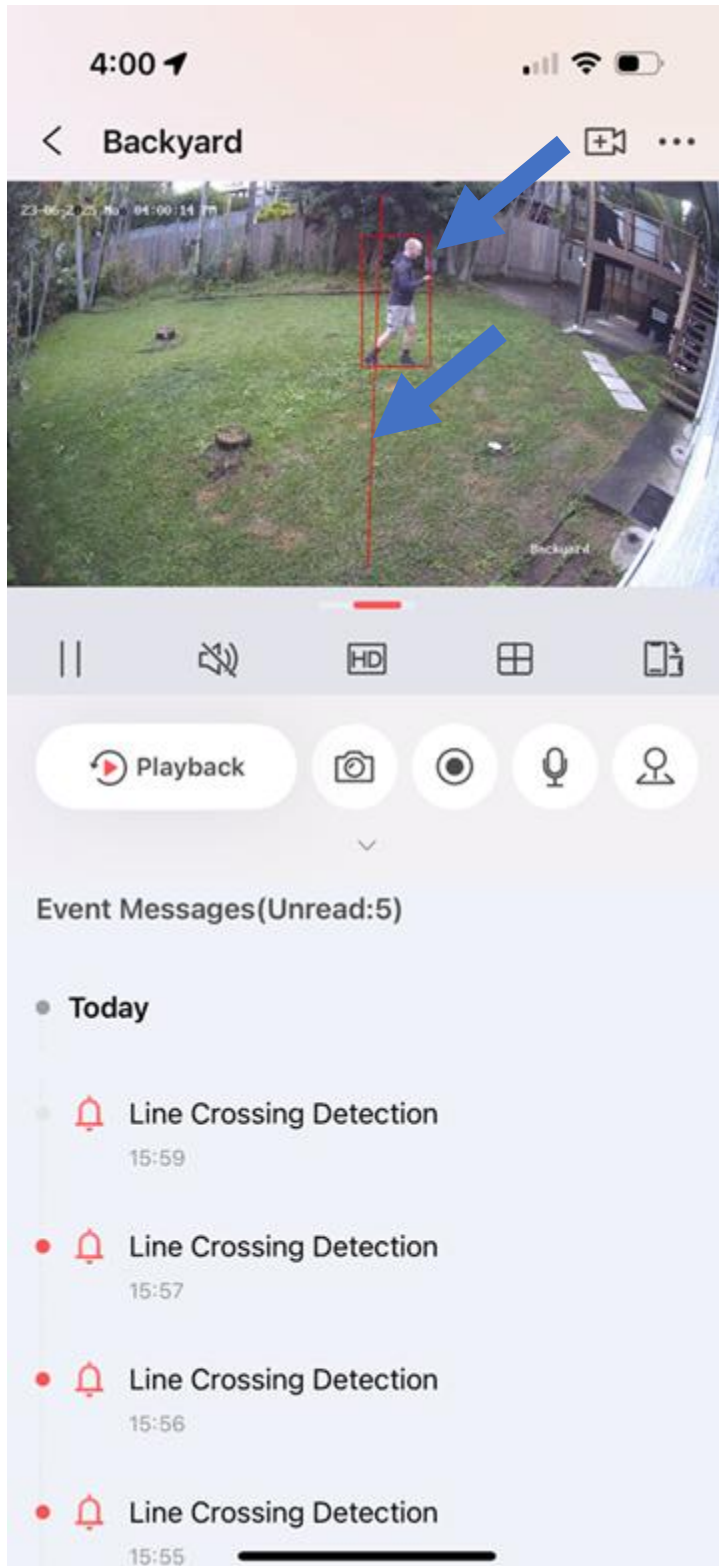

The target will begin being tracked by the camera, indicated by a green box around the target.

## STEP 8

As the target crosses the line, the perimeter protection event is triggered.

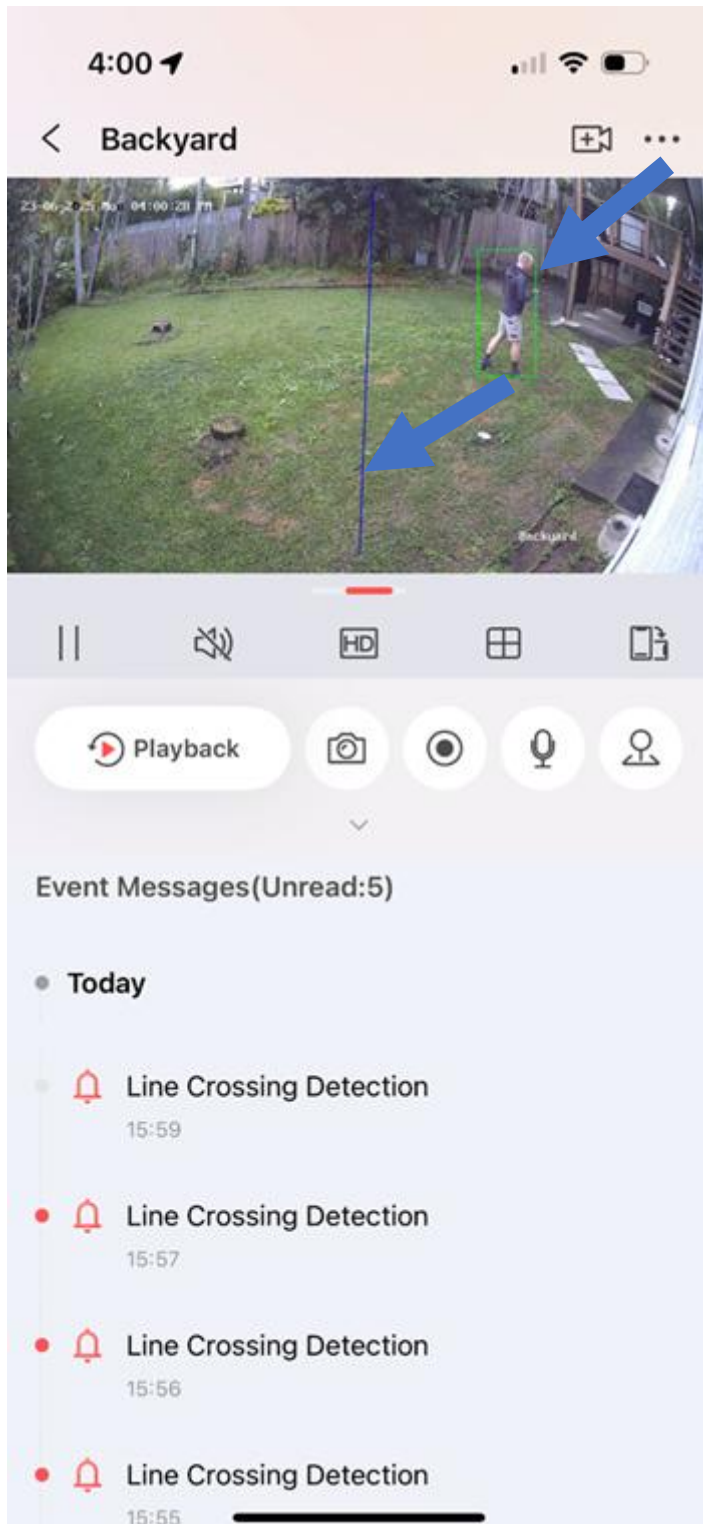

This is confirmed by both the line and the target box both turning red.

## STEP 9

After 2 seconds, the line and target return to their normal state, ready to be tested again.

## STEP 10

To turn off VCA Rules, return to the 'Me' > 'Settings' menu and turn off VCA Rules.

This will prevent them from being shown on the screen.
