# 55. HOW TO PLAYBACK FOOTAGE (JUNE 2025)
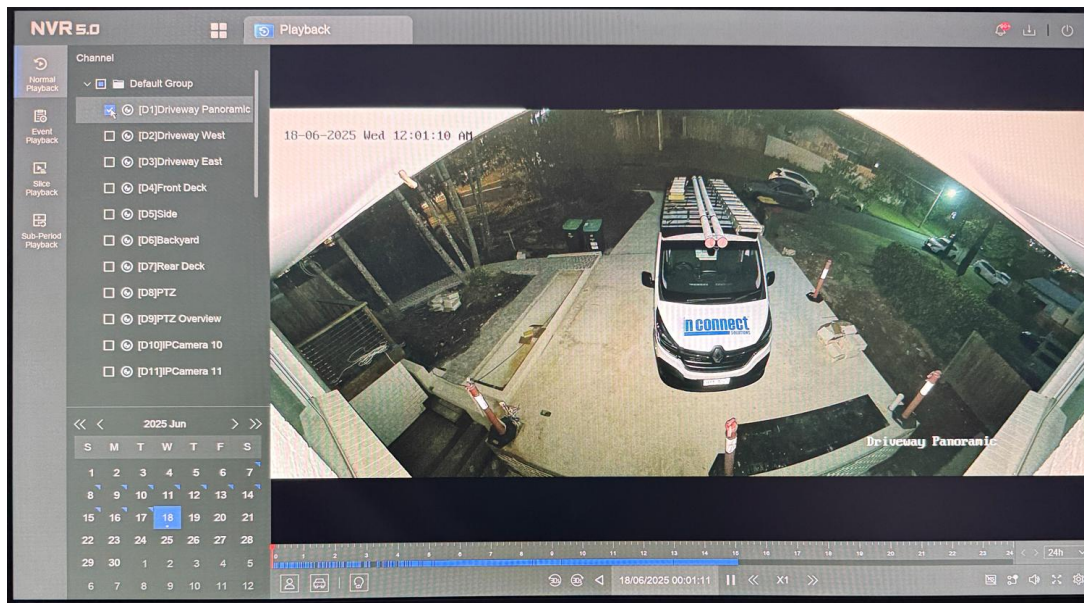

STEP 1

Click 'Playback'

STEP 2

Click on the required camera.
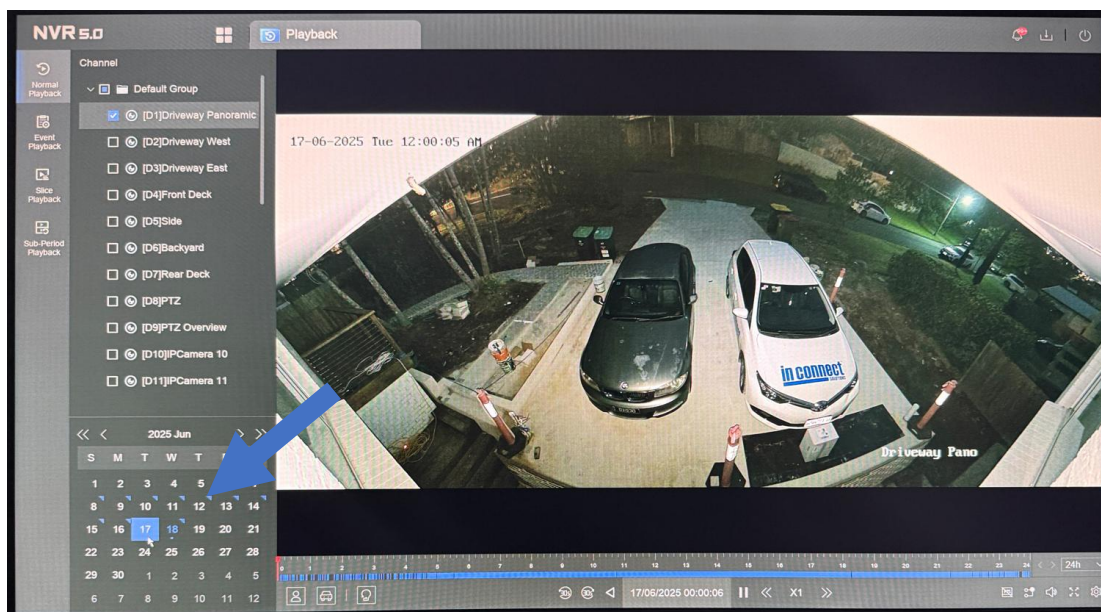

Only ever Playback 1 camera at a time.

STEP 3

The camera will start playback, beginning at midnight on the most recent day or the soonest footage after midnight.

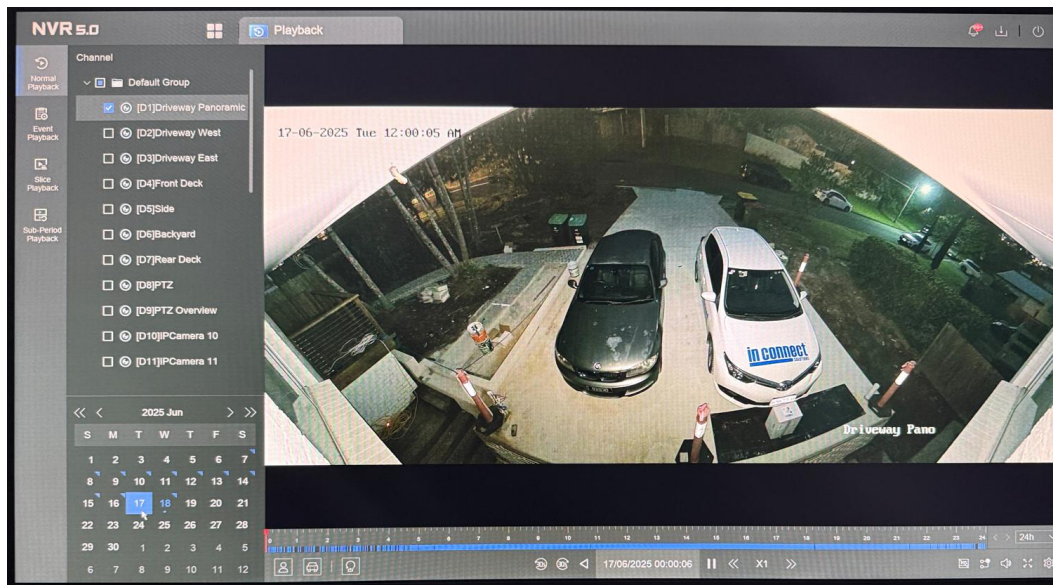

STEP 4

Move your cursor to the calendar in the bottom left corner.

Double click on the day and date you require.

STEP 5

The camera will start playing back on that day and date, at midnight or the soonest footage after midnight.

STEP 6

Inspect the timeline at the bottom of the screen to determine where the motion events are.

Motion events will be represented by blue bars/sections.

STEP 7

Click anywhere on the timeline to move to that time.

STEP 8

Change the timeline duration to refine the timeline length.

This can make it easier to move to specific times once you know approximately what time you want to move to.

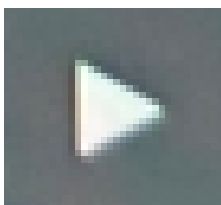

STEP 9

Use the previous arrow to move to the previous block of time.

Use the next arrow to move to the next block of time.

STEP 10

Use the play button to play.

STEP 11

Use the pause button to pause.

STEP 12

Use the speed up button to play in fast forward.

STEP 13

Use the slow down button to play in slow motion.

STEP 14

Use the reverse button to play in reverse.

STEP 15

Use the Fast Forward 30 sec button to skip forward 30 seconds.

STEP 16
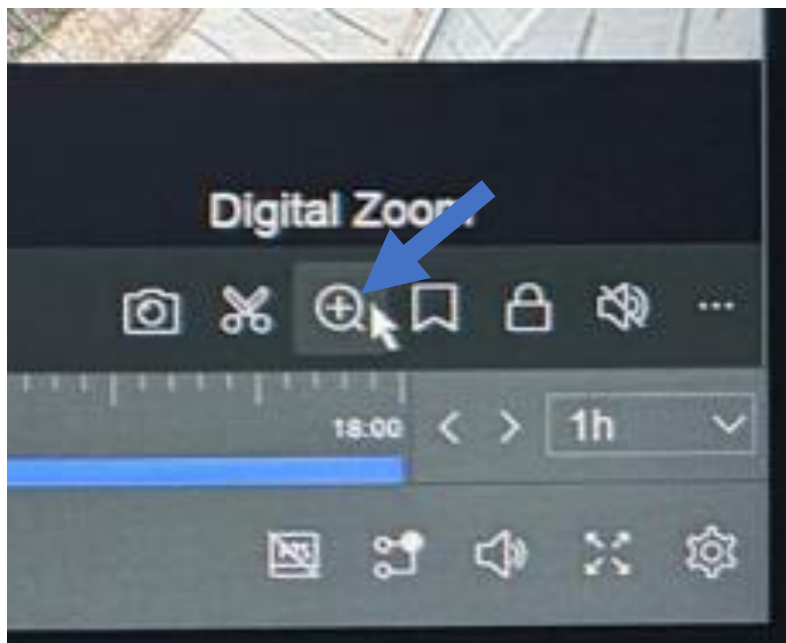

Use the Fast Reverse Button to skip backwards 30 seconds.

# STEP 17

To zoom in, hover your mouse over the screen.

Then click on the digital zoom icon.
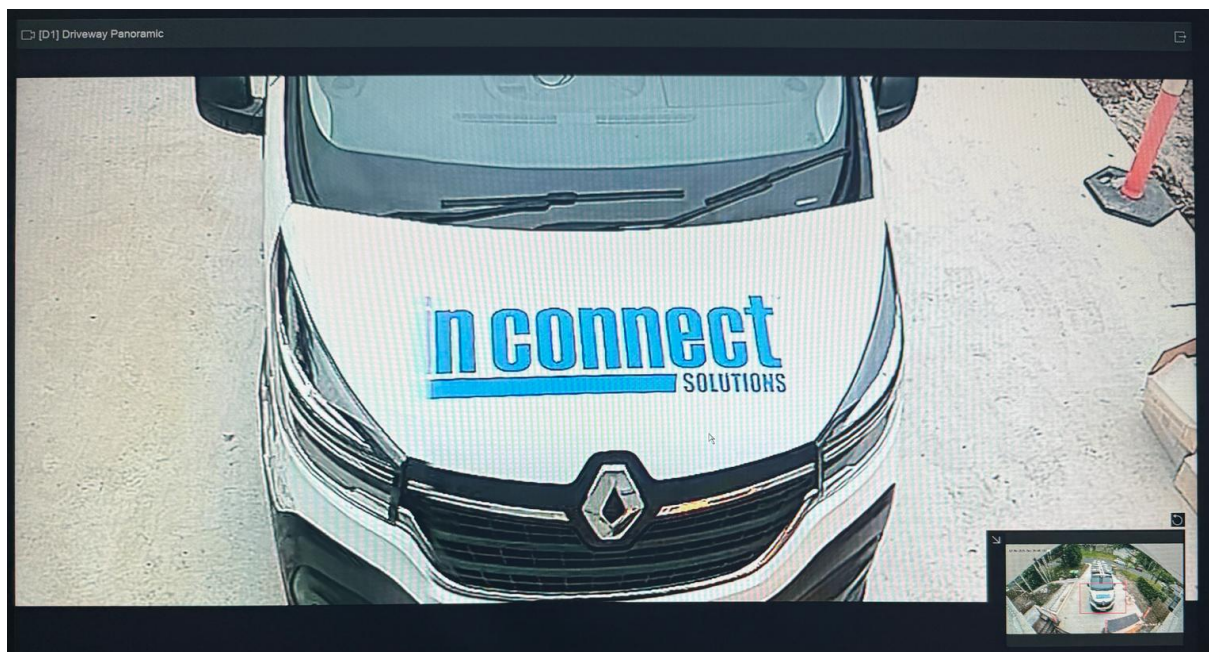

It can be found in the lower right hand corner.

STEP 18

Hold your cursor over the target you want to zoom in on.

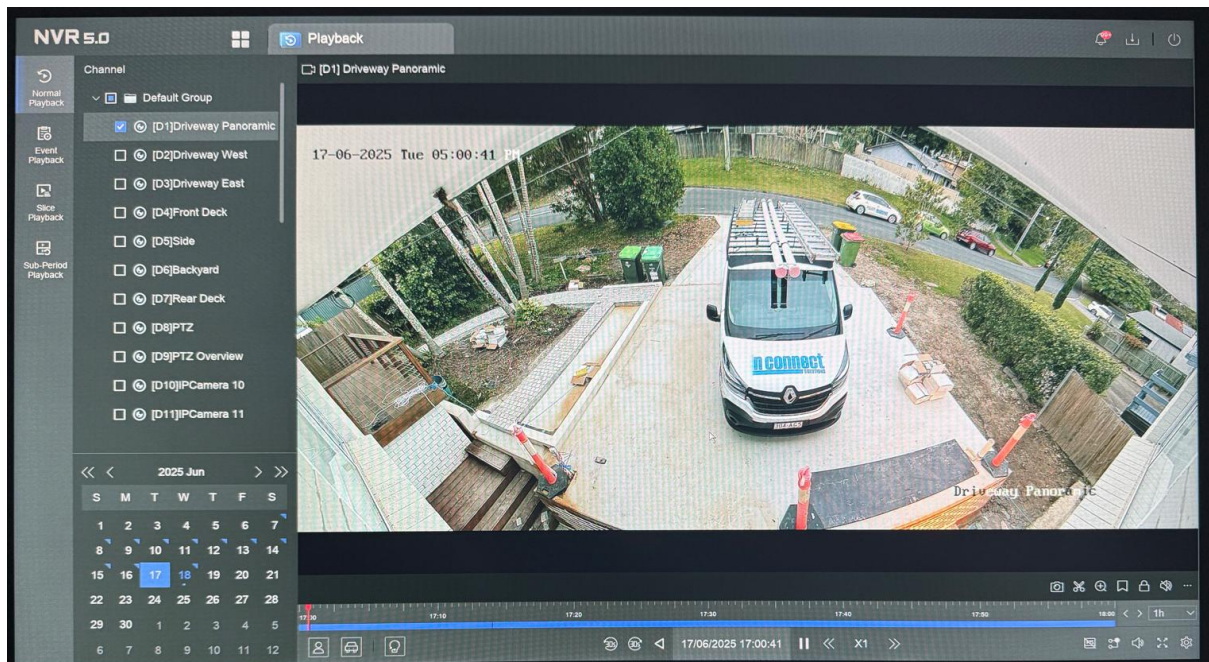

STEP 19

Scroll the mouse wheel up to zoom in.

STEP 20

Scroll the mouse wheel down to zoom out.

STEP 21

Once completed, right click to exit digital zoom.

STEP 22

Once completed, deselect the camera in the Channel list.

STEP 23

Once completed, close Playback.
